benjamin.andrew.hodge@gmail.com

In tandem with applying my technical acumen to solve real world challenges, I strive to cultivate meaningful relationships with everyone I meet. I am driven by shear internal will to succeed and see every failure as a chance to grow. I have proven myself resourceful in my quest for knowledge and experience true satisfaction when applying newly acquired skills.

Education:

Codeup
May 2018
Certificate of Completion
Full-Stack Web Developer - Java

Full Sail University
June 2017
Bachelors of Science
Game Design

Technical Skills:

HTML	CSS	JavaScript	Java	MySQL
node.js	express.js	npm	C#	Unity3D
Spring Framework	Git	jQuery

Recent Projects:

Full Stack Adlister Application
March 2018
This project features a full stack application which allows users to create advertisements and list them for other users to see and interact with. Using Java servlets and a MySQL database, each ad created is persistent and unique.

Alamo City Smiles Homepage
March 2018
Static web project created for a local dental office which provides visitors with an overview of the services provided. Created using standard front end technologies like Twitter Bootstrap and jQuery for future modular design.

Movie Application
February 2018
The project focuses less on the front end design of an application to offer more functionality for the user. It uses, front end technologies as well as persistent data storage. This app also takes advantage of lightweight frameworks, RESTful services and node.js.

Professional Experience:

Target:
San Antonio, TX.
Electronics Team Member
October 2017 – March 2017
I was entrusted as the subject matter expert for the entirety of the Electronics department in competitive national retail environment. I expertly communicated my technical know-how on the latest tech innovations with both guests and other team members. I conveyed information clearly and concisely in order to tailor a complete solution for their individual problems.

MarketSource:
San Antonio, TX.
Wireless Team Lead
November 2015 – August 2017
I handled cellular and other wireless electronics sales in a highly competitive environment. I led, trained and mentored new employees in best practices and situations encountered with different customers. I was promoted to team lead in 6 weeks due to superior performance and later was selected over 14 other to take over a failing program and raise it's standing in the district by 25% within a month.

Military Experience:

United States Army:
Ft. Hood, TX.
Infantry Fireteam Leader
February 2010 – June 2014
I was the senior gunner in my infantry platoon with an expertise in using the Bradley Infantry Fighting Vehicle and other wheeled vehicles. I led three subordinates directly and was often used as one of the main trainers for our company. I worked with senior leaders to develop practical solutions to common problems in both the maintenance and operation of these tracked vehicles. Those solutions were later made into standard operating procedures for our battalion.
